Summary

Full-Stack Developer with 9+ years of experience building scalable web and desktop applications. Proficient in C#, ASP.NET, and modern frontend tools like Vue.js and JavaScript. Passionate about crafting efficient solutions and collaborating across teams to deliver high-quality software.

A team player with strong problem-solving and debugging skills, capable of leading projects and collaborating with cross-functional teams. Selected twice as a Sub Team Lead, demonstrating leadership and adaptability in a fast-paced environment.

Soft Skills:

Strong communication skills – able to work effectively with clients and team members to translate business requirements into functional applications.

Adaptability – quickly learns and applies new technologies to enhance productivity and efficiency.

Collaboration & Leadership – experienced in working with diverse teams and mentoring junior

Career history

Software Developer (Project-Based)

Private Clients

June 2025 – Present

- Developed and maintained custom web applications using C#, ASP.NET Core, ASP.NET MVC, JavaScript, jQuery, HTML, CSS, Bootstrap, and SQL Server.
- Designed, developed, and integrated REST APIs to support web applications and third-party services.
- Designed database schemas and optimized SQL Server performance through query tuning, indexing, and efficient database design.
- Implemented new features, resolved production issues, and improved application performance and maintainability.
- Collaborated with clients to gather requirements, estimate timelines, and deliver project-based solutions.
- Managed source code using Git and followed best practices throughout the software development lifecycle.
- Utilized AI-assisted development tools (GitHub Copilot, Claude AI) to accelerate feature development, optimize SQL queries, refactor code, and streamline debugging.

Application System Engineer/Consultant at WeServ Systems International, Inc

Jun 2022 – April 2025 (2 years 10 months)

- Design systems or applications based on Client requirements.
- Develop programs based on design and requirements specifications
- Create test specifications and execute testing.
- Conduct review of technical work outputs.
- Bug fixing; Enhancements; Handling Change Requests
- Perform any other related tasks assigned by the direct Supervisor or Manager.
- Can lead or mentor junior developers. No need for Senior supervision
- Can already lead in team's operational tasks (initiatives)
- Can execute mutually agreed plans for the benefit of the customer
- Performs other work-related tasks assigned by the manager

Software Developer at Alalay Sa Kaunlaran Inc.

Jul 2017 - Jun 2022 (5 years)

- Develops and design appropriate software that can address the needs of the client
- Develops, tests, and debugs applications to ensure optimal performance.
- Provides computer application training for new users
- Provides system's troubleshooting and on call support for any client's concerns.
- Maintains records and prepares reports and correspondence related to work.
- Ensures to meet project deadlines

Skills

C#, ASP.NET Core, ASP.NET, VB.Net, Rest API, Vue.JS, JavaScript, JQuery, TypeScript, AJAX, HTML, CSS, Tailwind, Bootstrap, Git, MySQL, SQL, Database optimization, Dapper, Web Development, Software Development, .Net Core, .Net Development, MVC, GitHub Copilot, Claude AI (AI-Assisted Coding)

Languages

English, Filipino

Education

Bachelor of Computer Science/Information Technology from Nueva Ecija University of Science and Technology
Finished 2017
